

1. All manuscripts should be single spaced and in UK English. Please do not make indentations at the beginning of new paragraphs, but separate paragraphs by two carriage returns.
2. The title of the manuscript should be bolded in sentence case.
3. Authors should be listed as "title first-name surname" with multiple authors separated by commas with no punctuation within abbreviations, for example:

Professor John Doe MD, Dr Jane Jones PhD, and Dr Charles Stephens MD.

4. On a separate line please include affiliation for each author including name of department, institution, town, country, and contact details, for example an email address. If there are several affiliations, then please list each affiliation on a separate line, for example:

¹ Department of Obstetrics and Gynaecology, University of Oxford, United Kingdom, xxx@xxx.xx

² Division of Reproductive Endocrinology, Wayne State University, Detroit, USA, xxx@xxx.xx

5. Please use sub-titles generously to make for easier "on screen" reading. All sub-titles should be bolded in sentence case.
6. Please list references alphabetically according to the surname of the authors at the end of the manuscript using the Vancouver format with standard journal abbreviations.

Examples:

Sampson JA. Peritoneal endometriosis due to the menstrual dissemination of endometrial tissue into the peritoneal cavity. *AJOG* 1927;14:422–425

For books:

Lockyer C. *Fibroids and Allied Tumours (Myoma & Adenomyoma) Their Pathology, Clinical Features & Surgical Treatment*. London: Macmillan and Co Limited, 1918, 1st edition

or, if a chapter within a book:

Hummelshoj L and Bush D. Emotional aspects of endometriosis-related infertility. In: Allahbadia G, Merchant R, De Wilde RL, Verhoeven HC (eds). *Gynecological Endoscopy and Infertility*. India: Jaypee Brothers, 2005:400-403.

For references to websites/web-pages, please provide the complete URL hyperlinked to that online resource, stating the date on which that URL was accessed.

7. References within the manuscript should be in parenthesis listing the first author and the year of publication, ie:

xxxxxx (Stephens, 2005) xxxxxx (Jones et al, 2007) xxxxxx (Stephens and Jones, 2006)

In the case of several publications by the same first author in the same year, please use the standard suffix after the year, ie: (Stephens, 2005a; Stephens, 2005b)

8. Please do not use italics anywhere in the manuscript.
9. Please indicate within the manuscript where you wish tables and figures to be placed with the complete caption, ie: Figure 1: Title of the figure. However, pictures, graphics, and illustrations should be submitted separately as jpegs or gifs and clearly labelled (ie. please name them: "Figure 1 – Jones"; "Table 1 – Jones", etc, so that it is easy to identify which figures/tables belong to which article.

Please submit manuscripts to ejournal-editor@endometriosis.ca
